

The Sixth International Medical Congress of the Southeast European Medical Forum
Odessa, Ukraine (10.-12.09.2015)

has been accredited by the European Accreditation Council for Continuing Medical Education (EACCME) and is designated for a maximum of, or up to 15 European CME credits (ECMEC).

Dear Colleagues,

It is my great honor and privilege to welcome you to the VI th International Medical Congress, organized by SEEMF in cooperation with the Ukrainian Medical Association.

We are glad and proud that our medical forum is to be held in Odessa, Ukraine the “Perl of the Black Sea”, a city with a long, stormy and dynamic past, filled with cultural and historical sights.

This year our medical event is marked with the 25th anniversary of the Ukrainian Medical Association and its 14th Congress. We are deeply honored to be part of this anniversary and on behalf of the Board of SEEMF, I want to salute the Ukrainian physicians for all of their excellent work, accomplishments in medical practice and many contributions in medical science, despite the difficult period the country is going through.

Your presence at the Congress brings satisfaction and stimulates us continue sharing our findings and experiences in the field of medicine. I believe that the topics addressed during the Congress in the field of oncology, cardiology, reproductive health and military medicine will spark your interest, that through the lectures and workshops, we will learn something new and useful, and that through constructive discussions and social programme, we will be able to resolve medical dilemmas and questions we are facing.

Hearing about the new findings and experience of our colleagues from different countries in the public health will help us strengthen our partnership, collaboration and cooperation for further development of medical science and profession in order to make our world a better place.

I wish you a very successful scientific and professional work and enjoyable stay in Odessa, Ukraine.

*Dr. Andrey Kehayov, MD, PhD
SEEMF President*

Dear colleagues, dear friends,

It's a great pleasure to invite you to the 6th SEEMF Congress in Odessa.

South East European Medical Forum is one of the most active societies which joins countries from this part of Europe and represents the bridge between South and East Europe and also between East and West European Countries.

The most important mission of SEEMF is to promote the knowledge and the science in different fields of medicine, to unify the standards for management of patients with different diseases and to improve the standards of medical care systems. The society is growing and more and more countries join this forum which is the result of very active and high work of leading persons of SEEMF, particularly prof. Kehayov. It is important that we overcome the political and ethnical differences and that the aim of the society is to broaden the knowledge and to help each other in providing high quality of health care.

I believe that SEEMF Congress in Odessa will be an outstanding meeting with many participants of different branches of medicine. As usual, it will provide an opportunity for presenting new findings in professional and scientific field of medicine to exchange experiences, to discuss controversies. Therefore, I believe that we all will have opportunity to listen and to learn.

I am convinced that organizers from Ukraine will also provide friendly atmosphere and outstanding social events.

Therefore, I would like to invite everybody to join us at the 6th SEEMF Congress in Odessa.

*Prof. Dr. Pavel Poredoš, MD, Ph.D.
Vice President of SEEMF*

Dear Friends, Colleagues, Congress Participants!

We are glad to welcome you in one of the most beautiful places in Ukraine - the city of Odessa, where for the first time in our 24-year history such significant international medical forum will take place. Sincerely and with great pleasure we invite you to attend the VI International Medical Congress of the South-East European Medical Forum (SEEMF) in close cooperation with the Ukrainian Medical Association (UMA).

Today, our organization SEEMF, with head office in Bulgaria, brings together physicians, scientists and health professionals from 14 South-, East- and Central-European countries. We enable doctors of countries with close mentality and traditions to exchange experience and information on best practices in the health care systems. The multidisciplinary topics of our congress, the leading experts-lecturers in their field of expertise, scientists, and public health specialists make it possible for each of us to find the most appropriate way of professional development. I am sure that this will boost the credibility of the medical profession and enhance the public status of doctors.

The provisional program of the Congress is very intensive. Especially topical for Ukraine and for all of Europe, under the current conditions of war on the European continent, are the issues of military medicine. Tomorrow, God forbid, aggression can relate to each of you, and we must be prepared to simultaneously save more lives under major conflict conditions.

I am convinced that the Congress in Odessa will be successful continuation of our traditions established in Varna, Nessebar, Belgrade, Portoroz, Ohrid.

I hope that the rich cultural program, the historical landmarks of the Congress city in conjunction with the beautiful sea and Ukrainian hospitality will make your stay with us an enjoyable and memorable one.

We, the Ukrainian Medical Association, invite you to participate in the VI Congress of SEEMF, which will be an excellent opportunity for further professional and personal cooperation and friendship.

I wish you all success and good health!

*Yours sincerely,
Dr. Oleg Musii
SEEMF Vice President,
President of UMA,
Deputy Chairman of the Committee of Health of Parliament of Ukraine*

*Messieurs les Présidents
Chers Amis
Chers Confrères*

*It is for me a great honor and pleasure to be here in ODESSA , representing the WORLD MÉDICAL ASSOCIATION in front of you and all the medical associations of SEEMF .
And you will easily understand that it is with some emotion that I address you today because it is my first visit in Ukraine and my message is a message of Peace and of Indépendance .*

La WMA , que je préside , cultive au plus haut niveau les valeurs universelles de l'éthique :

1. The INDEPENDENCE of the doctor, which should be duly respected by the political, the administrative, the military as well as the religious authorities. The independence of the doctor's decision is at stake in the TRUST indispensable to the doctor – patient relationship.

2. The PROFESSIONAL SECRECY: in all circumstances, including during armed conflicts, the professional secrecy should be respected as well as the INFORMATION on the patients, and their CONSENT to the health care proposed to them.

3. A high-level and quality EDUCATION is at the cornerstone of the competence of doctors and it is essential that the WMA be one of the effective players in this field, especially through the development of the worldwide Junior Doctors Network. The JDN has demonstrated its role within the WMA. The WMA should be at the service of the education of the doctors of tomorrow.

4. Let us not forget the PROTECTION of our patients' PERSONAL DATA, at this time of new technologies, e-health and m-health. The protection of these sensitive data should be enhanced as rigorously as possible without jeopardizing the evolution of our medical science.

5. At the same time, in a world where everything tends to have a monetary value, we should remain very watchful in all potential CONFLICTS of INTERESTS. The human being must always prevail over finance bearing in mind that the well-being of the human being cannot be dissociated from financial contingencies. The WMA has to participate in finding a balance between « primacy of individual » and « societal primacy. »

All these ethical values have been masterly underlined in the last version of the Declaration of Helsinki, which is a shining example of universality of medical ethics. Even if its drafting seemed to be laborious, our Declaration of Helsinki has the merit to compile the cultures of 111 medical associations and, thus, is an authentic factor of PEACE and UNION between medical professions around the world in full respect for the patients and for the care.

I am French and my country, France, is not only the country of human rights but also a Republic which is based on the triptych: LIBERTY, EQUALITY, FRATERNITY since 1789 (and the French Revolution). This triptych is based on the inescapable principle of RELIGIOUS NEUTRALITY,

Therefore, I will strive to promote healthcare EQUITY for each human being regardless of his or her language, culture, religion...

To conclude, one last wish: our current world is going through a dramatic increase of armed conflicts in which the values of our association are permanently violated. NEUTRALITY remains an inescapable ethical value, as much in our schools as in our administrations and our hospitals. This neutrality, is the guarantee for a deep respect for all cultural differences and the negation of all kinds of fundamentalism.

That is why I am asking everyone to be peacemakers by strictly observing these values within your Associations, your Governments but also towards each of your patients.

Let us be the actors and also the builders of a healthier, fairer and more equitable society in which human rights, but also liberty, equality and fraternity as well as health care quality enable each person to grow and live in Peace.

Let us be doctors acting towards peace in the name of the universality of ethics of our Medical Association...!

Merci mes amis de la SEEMF votre action européenne et mondiale est remarquable et grâce à votre infatigable dynamisme la SEEMF , la WMA et l'ensemble des NMA sont un exemple d'éthique au service de nos patients et de Paix entre les nations

*Docteur Xavier DEAU
President WMA*

Dear Colleagues,

It is an honor for the Ukrainian Medical Association to welcome the colleagues from our neighboring countries united in South East European Medical Forum and the guests of the Congress. We believe that the reports and discussions on all Congress symposia will be interesting and useful to both - Ukrainian doctors and foreign colleagues.

It is especially important for us that this international forum is held on the 25 year anniversary of the re-establishment of our activities and is combined with the XIV Assembly of our Association.

We suggest members of the Congress pay attention to the roundtables, which will discuss issues of medical associations' activity in transforming societies and public health problems. We invite our colleagues at the big satellite event - All-Ukrainian medical council dedicated to discussing the ways of implementing of the physicians self-government in Ukraine.

On behalf of the Board of Ukrainian Medical Association I wish all participants of the VI Congress of South-East -European Medical Forum productive work and good communication.

Sincerely,

Mykola Tyshchuk, chairman of board of the Ukrainian Medical Association.

Вельмишановні колеги!

Для Всеукраїнського Лікарського Товариства є велика честь приймати на своїй рідній землі колег з країн наших сусідів, об'єднаних в Південно-Східно-Європейському Медичному Форумі та гостей Конгресу. Ми впевнені що доповіді і дискусії на всіх симпозіумах конгресу будуть корисними і повчальними для всіх учасників Конгресу – лікарів України і закордонних колег.

Для нас особливо важливо, що цей поважний міжнародний науковий форум проходить в рік 25 річчя відновлення нашої діяльності і поєднано з XIV з'їздом нашого Товариства.

Ми впевнені, що учасники Конгресу не обійдуть своєю увагою круглі столи, на яких будуть обговорюватися питання діяльності лікарських асоціацій в суспільствах що трансформуються і проблеми громадського здоров'я. Чекаємо наших колег на сателітному заході Всеукраїнській лікарській раді присвячені обговоренню шляхів запровадження лікарського самоврядування в Україні.

Від імені Правління Всеукраїнського Лікарського Товариства бажаю всім учасникам VI Конгресу Південно-Східно – Європейського Медичного Форуму плідної роботи і гарного спілкування.

З повагою,

Микола Тищук, голова правління ВУЛТ.

Dear colleagues,

We must consider the influence of congresses of SEMF on medicine in the countries of Southeast Europe, as the exchange of ideas about the medical practice and science in our region, as well as public health.

We do recognize the need of exchange of knowledge between the participants of our congresses.

We extend our appreciation to the organizing committee of congress, whose professional efforts make possible the meeting of physicians, medical scientists and public health specialists from Southeast Europe and other countries from Europe and Asia.

We are pleased to be able to obtain and publish the summaries submitted by congress participants before they are lost to time. They are important for the medicine in this part of Europe. I hope the Odessa congress will gain wide recognition.

PROVISIONAL AGENDA

SIXTH INTERNATIONAL MEDICAL CONGRESS

9 - 12 September, 2015

Sad Pobedy

Odessa, Ukraine

Wednesday, 09 September 2015

Arrival of participants

18:00 Opening Ceremony

Thursday, 10 September 2015

Oncology

- 09:00 – 09:15 Surgical treatment of liver metastases from colorectal cancer, Prof **Nikola Jankulovski** MD PhD, Dean of the Medical Faculty-University "Ss. Cyril and Methodius in Skopje, Macedonia
- 09:15 – 09:30 Cancer Epidemiology in Adjara since 1902 to 2012 years, **Memed Jintcharadze**, Ajara Regional Organization of Georgian Medical Association, Georgia
- 09:30 – 09:45 Treatment of Cervical Intraepithelial Neoplasia, **Goran Dimitrov** MD PhD, President of the Macedonian Medical Association, Skopje, Macedonia
- 09:45 – 10:00 Radionuclide imaging in bone tumours, Prof. **Daniela Miladinova** MD PhD, Vice Dean of the Medical Faculty-University "Ss. Cyril and Methodius" in Skopje, Macedonia
- 10:00 – 10:15 Cancer pain, Acad. **Wladimir Ovtscharoff**, Academician of the Bulgarian Academy of Sciences, Bulgaria
- 10:15 – 10:30 Haematopoietic stem cell transplantation and Hodgkin's lymphoma, Prof **Sonja Genadieva Stavrik** MD PhD, University "Ss. Cyril and Methodius" in Skopje, Macedonia
- 10.30 – 11:00 Coffee break**
- 11:00 – 11:15 The incidence of leukemia in children of Belarus as a consequence of chronic irradiation in low doses, **T. Terehovich**, Medical Technology Center, Minsk Belarus
- 11:15 – 11:30 Laparoscopic and video-assisted surgeries in colorectal cancer surgery. **D.M. Osadchiy**, Odessa National Medical university Center for reconstructive and regenerative medicine (University Hospital), Ukraine
- 11:30 – 11:45 A systemic approach to the surgical treatment of patients with extensive tumors of the small pelvis **O.V. Lukianchuk**, V.V. Lysenko, M.A. Lysenko, L.G. Rosha, D.O. Lukianchuk Odessa National Medical University Center for reconstructive and regenerative medicine (University Hospital), Ukraine
- 11:45 – 12:00 Methods to optimize the treatment of patients with regional breast cancer, **V.G. Dubinina**, O.V. Bondar Odessa National Medical university, Center for reconstructive and regenerative medicine (University Hospital), Ukraine
- 12:00 – 12:15 Early diagnostics of cervical cancer in Ukraine: problems and perspectives, **O.V. Lukianchuk**, S.L. Tsevelev Odessa National Medical university Center for reconstructive and regenerative medicine (University Hospital), Ukraine
- 12:15 – 12:30 Role of Uterine Artery Embolization in the Management of Cervical Cancer, **O.V. Lukianchuk**, O.M. Timakov. Odessa National Medical university, Center for reconstructive and regenerative medicine (University Hospital), Ukraine

- 12.30 – 14:00 Lunch break**
- 14:00 – 14:15 Pathology services at the university clinic - the formation of a new type of the oncomorphology. **L.G. Rosh**a, Odessa National Medical university Center for reconstructive and regenerative medicine (University Hospital), Ukraine
- 14:15 – 14: 30 Survivability of patients with plural metastases of colorectal cancer in a liver after radio frequency thermoablation. **Dubinina V.G.**, Maksimovskiy V.E., Chetverikov S.G., Odessa National Medical university, Center for reconstructive and regenerative medicine (University Hospital), Ukraine
- 14: 30 – 14: 45 The systems of free-radical oxidization and antioxidization defense of Patients with benign epithelial tumours of ovaries. **Lisenko M.A.** Odessa National Medical University, Center for reconstructive and regenerative medicine (University Hospital), Ukraine
- 14: 45 – 15:00 Using of technique of MOHs for operative treatment of patients with the malignant non-melanocytic tumours of skin, **V.G. Dubinina**, O.V. Zavoloka, V.V.Sazhienko, L.G. Rosha, Odessa National Medical University, Center for reconstructive and regenerative medicine (University Hospital), Ukraine
- 15:00 – 15:15 Personalisation of holiatry of patients with the breast cancer of 2 and 3 stages, **V.G. Dubinina**, S.O. Zavoloka, O.V. Zavoloka Odessa National Medical University, Center for reconstructive and regenerative medicine (University Hospital), Ukraine
- 15: 15 – 15: 30 Colour Visualization of scopes of Tumour Defeat of Larynx as final Diagnostics, **Evchev F.D.**, Evcheva A.F. Odessa National Medical University, Ukraine
- 15: 30 – 15:45 Possibilities of MRT-methods in diagnostics and stages definition at cervix cancer of uterus, **Dubinina V.G.**, Lukyanchuk O.V., Demidova O.O. Odessa National Medical University, Center for reconstructive and regenerative medicine (University Hospital), Ukraine
- 15:45 – 16:15 Cofee break**

Cardiology

- 16:15 – 16:30 Do the Effects of Secondary Prevention of Cardiovascular Events in PAD Patients Differ from Other Atherosclerotic Disease?, Prof. **Pavel Poredos**, MD, PhD, Department of Vascular Disease, University Medical Centre Ljubljana, President of Slovenian Medical Association, Slovenia
- 16:30 – 16:45 Innovations in Interventional Cardiology, **Nickolas Kipshidze**, MD, PhD, FACC, FSCAI, FESC, Professor of Medicine and Surgery, Member of Parliament of Georgia
- 16:45 – 17:00 Renal replacement therapy after heart surgery in octogenarians-single center nine years experience, **Tsaryanski G**, Tenev B, Abedinov F, Natzev I, Manolova V, Dimitrova V, Peitcheva S, Natchev G, University Hospital "Saint Ekaterina" Sofia, Bulgaria
- 17:00 – 17:15 Hybrid procedures by patients with complex aortic pathology - single center experience, **Kolev B.** MD; Petkov D. MD, PhD; Nachev G. MD; PhD, University Hospital "Saint Ekaterina" Sofia, Bulgaria
- 17:15 – 17:30 Neonatal Cardiomyopathies, **George Chakhunashvili**, MD, PhD, Social Pediatric Protection Fund, Georgia
- 17:30 – 17:45 Experimental development of a new blood pump for artificial circulation systems, **Nodar Khodeli**, Professor of Anatomy Department, Faculty of Medicine, Javakhishvili Tbilisi State University, Chief of Scientific Training Center of the Experimental Surgery Institute of Morphology, Tbilisi, Georgia
- 17:45 – 18:00 State of the Art Approach to Mitral Valve Disease Treatment, Prof. **Salis Tager** MD, Head of the Cardio-Thoracic and Vascular surgery Dept. , Head of Cardiac Surgery, Acibadem- Sistina Clinical Center, Skopje, Macedonia

Friday, 11 September 2015

Round table: Profession autonomy of physicians: legislation and implementation; Public health in transforming societies

- 09:00 – 09:15 An example of an independent WMA's National Medical Association: the FRENCH MEDICAL COUNCIL, Dr. **Xavier Deau**, President of the World Medical Association
